**Proposals should be typewritten in English and should not exceed one page; use letter size 11**

Summarize the main scientific achievements and current research activities of the nominee. Outline how the work of the nominee distinguishes itself from the work of others in the field and its possible implications for the improvement of human health.

Add a list of the five most important publications (excluding books and reviews) of the nominee on a separate page and provide a copy of these five papers.

Add further a curriculum vitae and a list of her/his peer-reviewed publications (with exclusion of conference talks and abstracts).
